PROFESSIONAL SUMMARY

Full Stack Developer and AI Engineer with 1.5+ years of professional experience building, deploying and supporting production web applications. Sole developer at SPS Global Group, an international real-estate advisory with offices in Dubai, Gurugram and Kuala Lumpur, where I delivered **4 business systems in under 3 months**: two live company websites, an in-house lead CRM that replaced third-party software, and a multi-office HRMS with an Android app. Hands-on with Node.js, Express, NestJS, React, Next.js, TypeScript, MySQL, MariaDB and PostgreSQL, with strong focus on RBAC, REST APIs, secure authentication and automated testing. Experienced in the Dubai real-estate domain (AED pricing, developer projects, lead routing) and in Meta / Google lead-form webhook integrations. Builds LLM tool-calling and agentic features, and uses AI-assisted development (Claude, GitHub Copilot) to ship faster while owning architecture, security and quality. MCA graduate (2026).

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, PHP, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Vite, Tailwind CSS, Bootstrap, Responsive Design, Capacitor (Android)
Backend & APIs: Node.js, Express.js, NestJS, FastAPI, REST API Design, Webhooks, WebSockets, OAuth 2.0, JWT & Session Auth
Databases: MySQL, MariaDB, PostgreSQL, Oracle SQL, MongoDB, SQLite, Redis, Cloudflare D1, Prisma ORM, Schema Design, Transactions
Security: RBAC, Password Hashing, CSRF Protection, Rate Limiting, CSP / HSTS, Prepared Statements
AI Engineering: Claude API, LLM Tool-Calling / Function-Calling, Agentic Workflows, Streaming Chat; Claude, GitHub Copilot, ChatGPT
DevOps & Testing: Docker, Docker Compose, Git / GitHub, GitHub Actions CI, Vercel, Railway, Render, GoDaddy, Playwright E2E, Node Test Runner
Methods & Tools: Agile / Scrum, VS Code, Postman, phpMyAdmin

PROFESSIONAL EXPERIENCE

Full Stack Developer — SPS Global Group (SPS Global Realtors)

Aug 2026 – Present | International real-estate advisory: Dubai, Gurugram, Kuala Lumpur, Bangkok, Accra

- Sole developer reporting directly to the CEO and Managing Director; own requirements, architecture, development, testing, deployment and production support.
- Delivered 4 business systems in under 3 months, 3 of them live: spsglobalgroup.com, spsglobalinvestment.com, SPS PulseCRM (spsnexora.com) and SPS HRMS with an Android self-service app.
- Built spsglobalgroup.com with Dubai property search (AED budget filters), ROI and rental-yield calculators, viewing bookings and seller valuations, routing every enquiry to the right office across 5 markets.
- Replaced the company's third-party CRM with SPS PulseCRM (spsnexora.com), an in-house Node.js + MariaDB CRM; connected Meta (Facebook / Instagram) Lead Ads, Google / YouTube lead forms and website forms via authenticated webhooks.
- Built spsglobalinvestment.com with a secure investor portal (statements, payout schedules) and a role-based admin panel with read-only viewer access.
- Secured all systems with hashed passwords, separate session cookies, CSRF protection, rate limiting, CSP / HSTS and prepared SQL; shipped via versioned migrations, CI and automated E2E tests.

Frontend Developer Intern — TechniqueIT Solution LLP

Jan 2026 – Jun 2026

- Built responsive production interfaces with React.js, JavaScript, HTML5, CSS3 and Bootstrap in an Agile startup team.
- Integrated REST APIs connecting frontend screens to Node.js / PHP services and MySQL databases.
- Replaced manual data workflows with web-based tools and delivered features under tight deadlines with senior developers via Git.

Software Support Engineer — RS Barcoder Pvt. Ltd. (Client: Escorts Kubota Ltd.)

Oct 2024 – Nov 2025

- Supported manufacturing digitalisation (PMS) at Escorts Kubota: production plans, barcode scanners, label printing and shop-floor reporting.
- Investigated application and data issues with Oracle SQL and MySQL; debugged API integrations built on Node.js and PHP.
- Reduced downtime by resolving backend failures and coordinating fixes with development and operations teams through deployment and post-release support.

LIVE PRODUCTION SYSTEMS & PROJECTS

SPS Global Group — Company Website (Live)

Live: spsglobalgroup.com | Node.js, MariaDB, CMS, Lead Routing, CSRF & Rate Limiting

- Global real-estate platform with Dubai developer projects (Azizi, Sobha, DAMAC), AED filters, ROI calculators, bookings and seller valuations.
- Staff back office with enquiry CRM, property / blog / careers CMS and admin-managed sales logins.

SPS Global Investment — Investor Platform (Live)

Live: spsglobalinvestment.com | Node.js, MariaDB, Investor Portal, RBAC

- Investor-relations website with secure investor login, statements and payout schedules, plus staff / admin panel for investors, enquiries and reports.

SPS PulseCRM — Real-Estate Lead CRM (Live)

Live: www.spsnexora.com | Node.js, MariaDB, Docker, Webhooks, RBAC, Automated Tests

- Lead pipeline from New to Converted / Lost with lead scoring, API-enforced admin vs. sales-agent permissions, bulk actions, follow-up reminders and CSV import / export.

SPS HRMS + Android App (Internal)

UI Demo: mk-hrms-attendance-demo.vercel.app | React, Vite, Express, MySQL, Capacitor, Playwright

- Multi-office HR platform for India, Dubai, Malaysia and Thailand: GPS-geofenced attendance with office time zones, leave, payroll with PDF payslips and a document vault.

JARVIS — Agentic AI Assistant

Live Demo: jarvis-ai-assistant-demo.vercel.app | Python, FastAPI, WebSockets, LLM Tool-Calling

- Voice and text assistant streaming responses over WebSockets, running actions via LLM tool-calling with human confirmation before sensitive steps.

HospitalOS Enterprise — Hospital Management System

Live Demo: hospitalos-enterprise-demo.vercel.app | React, Node.js, Express, MySQL, JWT, Chart.js

- Role-based platform for admin, doctors, reception, lab, pharmacy and billing; patients, appointments, invoicing, inventory, multi-branch and analytics.

OmniKaam AI — Service Marketplace

Live Demo: omnikaam-ai-demo.vercel.app | Next.js, TypeScript, Cloudflare D1

- Multi-role marketplace from service discovery and quotation to booking, invoicing and payment, with 100 demo provider profiles.

Scolex OneBiz — Multi-Tenant Retail SaaS (In Progress)

UI Demo: scolex-onebiz-demo.vercel.app | React Native, NestJS, Prisma, PostgreSQL, Redis

- One codebase serving 8 retail verticals via a template engine, with tenant isolation, WhatsApp Business API, Razorpay and offline sync.

Other Deployed Projects

- **LogiFlow Enterprise** (transport & fleet management) — logiflow-enterprise-demo.vercel.app
- **CardPerks Analytics** (PostgreSQL / Supabase, 10,000-row server-side pagination) — cardperks-analytics-demo.vercel.app
- **GarmentFlow** (QR inventory, POS billing, JWT) — garmentflow-qr-inventory-demo.vercel.app
- **CrimeGrid** (Node.js, MySQL, JWT, audit logs) — crimegrid-india-demo.vercel.app | GitHub
- **Real-Time NIFTY 50 Tracker** (Python, WebSocket, OAuth 2.0) — nifty-live-tracker-demo.vercel.app | GitHub
- **TaxSaathi ITR** (guided tax filing) — taxsaathi-itr-demo.vercel.app

EDUCATION

- **Master of Computer Applications (MCA)** — Maharshi Dayanand University (MDU), 2024 – 2026
- **B.Voc, Software Development** — Maharshi Dayanand University (MDU), 2021 – 2024
- **Diploma in Full Stack Development** — IICS, 2023 – 2024

ADDITIONAL INFORMATION

- **Location preference:** Dubai / UAE — ready to relocate; available for virtual interviews
- **Languages:** English, Hindi
- **Domain experience:** Real estate (Dubai market), investment / fintech, manufacturing, healthcare, HR
